Bob – That sounds perfect. I think it will work out best for you to kick off the panel discussion with a few words from the LWG. Three slides sounds perfect. The panelists can then explore some of the other issues that are raised during the day. I really appreciate you doing this.

Thanks again,
Holly

Subject: RE: Workshop on Monday

Hi Holly, I am actually in an Exec session this morning and got the group to approve a presentation that will be comprised of 3 slides. The first will be the status of deliverables (schedule) through the FS. The second will be a flow chart showing the process for developing clean up levels. The third will be a slide that shows a process chart for how clean up goals are achieved. Chip, the last two slides are the ones you saw at our last combined presentation.

Thank you,

Bob

Subject: Workshop on Monday

Chip, Jim and Rick, Bob – I am checking in on the workshop on Monday. As we have discussed, we will kick off the workshop with 15-20 minute presentations from Chip, Jim & Rick on the

background, status, timeline and remaining big issues of the Portland Harbor. You can do this with a powerpoint, notes or off the top-of-your-head.

We will then have presentations about fish consumption, Oregon's new water quality standards and the Baseline Human Health Risk Assessment for the Portland Harbor. After these technical presentations, we will have a 15 minute presentation from Bob Wyatt about the next steps at the Portland Harbor - followed by a panel discussion on some of the big issues raised during the workshop. There will definitely be some big issues raised, but I anticipate discussion about: implications and implementation of the water quality standards, road to Feasibility Study, Cleanup Levels, where do we go from here?

I think we can anticipate some interesting and possibly passionate discussion about these issues. We have clearly hit on some important and unresolved issues. I'm really looking forward to the workshop. Please let me know if you have any questions or concerns.

You can access the agenda [here](#).

Thanks again,

Holly
